

MONTHLY FIRE ALARM TESTING	YEARLY FIRE ALARM INSPECTION
<p>Please be advised that Monthly Fire Alarm Testing takes place on the last Tuesday of each month.</p> <p>This routine testing ensures that the fire alarm system in each condo unit is functioning properly. During the test, residents will hear a loud buzzing sound, which may be disruptive but will only last a short time.</p> <p>We appreciate your understanding and cooperation as we perform this important safety check.</p> <p>Thank you.</p>	<p>Please be advised that the Yearly Fire Alarm Inspection will occur during the month of September each year.</p> <p>As all units are required to have this testing, you will be asked to ensure we have access to your unit between 9:30 am and 3:30 pm. on the day your building is scheduled to be tested.</p> <p>You will be asked to let the board know if you are not available. A Board Member will need to have access to your Condo to facilitate the inspection by A One Systems.</p> <p><u>If we cannot access your unit because of a change of locks, or from not giving us authorization to enter, a charge will be applied for a return visit for the fire testing.</u></p>
